

Final System Resolution and Automated Correspondence – US-008

1. Overview

The **Movie Ticket Request** lifecycle concludes with the successful automated resolution of the case. As part of **US-008**, the system generates and dispatches an automated correspondence notification when the booking is successfully completed.

A predefined **Correspondence rule** is used to automatically populate the notification with dynamic case properties. This eliminates the need for manual preparation or tracking of booking confirmations and provides the customer with immediate access to their booking information.

2. Automated Correspondence

When the **Movie Ticket Request** case is completed and resolved, the Correspondence rule is triggered automatically.

The system retrieves the required information from the case and maps the values into a structured email template.

The following dynamic properties are included:

- **Case ID**
- **Customer Name**
- **Movie Name**
- **Show Date & Time**
- **Number of Tickets**
- **Seat Numbers**
- **Total Cost**

Process Flow

Booking Execution → Booking Completed → Case Resolved → Correspondence Rule Triggered → Dynamic Data Populated → Email Dispatched to Customer

3. Final System Output Example

Subject: Movie Ticket Booking Confirmed - [Case ID]

Dear [Customer Name],

Your movie ticket booking has been successfully confirmed.

Booking Details

Property	Value
Case ID	[Case ID]
Movie Name	[Movie Name]
Show Date & Time	[Show Date & Time]
Number of Tickets	[Number of Tickets]
Seat Numbers	[Seat Numbers]
Total Cost	[Total Cost]

Instructions:

Please arrive at the theatre before show time and present your booking details at entry.

Thank you for choosing our services. Enjoy your movie!

— CineWave Entertainment Booking Support

4. Expected Outcome

After successful completion of the **Movie Ticket Request**, the system automatically resolves the case and sends the booking confirmation to the customer.

This automated process:

- Reduces **manual tracking errors**.
- Provides **immediate booking confirmation**.
- Ensures all important booking details are communicated consistently.
- Improves **customer visibility and experience**.
- Maintains a clear record of the completed booking.

5. Complete Movie Ticket Booking Lifecycle

The final system follows the complete automated lifecycle:
